(\*\*) **You can find more information about the functionality of the editors of SaltOS in [ayuda general](#)**

## Send new mail

When sending a new email, you can select which account you want to send (in case you have more than one account set).

To add recipients, start typing in the text box (\*) *For*. As you type the name or address of the recipient, SaltOS will propose several results that match the entered text. If the recipient is listed, select it to add it to list. Otherwise, type the full address of the same.

To submit a *carbon copy* or *blind carbon copy* Add recipients to the fields *CC* or *BCC* respectively.

To receive an acknowledgment of the recipient, check the box *Order acknowledgment*. Note that this mechanism is not automatic, but the recipient may choose not to answer the request having received and consulted mail.

To add a predefined text mail, select the template name in the dropdown *Predefined texts* and click *Add*.

To send one or more files, select the tab *New files attachments*. To add more than one file click *Upload file*. To select the file to send, click *Select File* and indicate this through dialogue.

### Viewing a mail

In query mode mail you can perform the same functions as in list: reply to the sender, reply all and add it to the homepage. You can also mark as *slope* or *SPAM* checking the corresponding check box and clicking *Return*.

You can see the entire mail tab *Zoom mail*.

If mail has attachments, you can view and download the tab *Attachments*. To perform a download multiple files at once, select them and click *Download selected files*.
