

Documents

The documentary SaltOS manager, allows you to organize and share your documents and files.

You can relate the documents uploaded with a client or project to maintain a perfect organization of your documentation.

The documents will not be uploaded loose, but can group them as if they were folders. This way you can save multiple versions of a document or multiple documents for the same purpose.

Listing

The list will show the most important parameters of the different file folders or containers. The last two columns, *NC* and *NF*, We show the number of comments and the number of files in the folder respectively.

Listing Options

On each record you can perform a series of actions that are represented by the following icons:

- 🔍 ✎ 🗑 Check / Edit / Delete Record.

Filter Options

For more information about the filter options listed in the [ayuda general](#).

Form documents

This is the application documents with it can add, modify, view and download documents. The document data are classified in different tabs. Main data, comments, file attachments, data on the registry modifications and assignments to folders.

Document Info Tab

In this tab you can view and modify the main customer data. Here we relate all information fields.

- **Customer:** To link the document to a particular customer.
- **Project:** To link the document to a particular project.
- **Name (*):** File name.
- **Description (*):** Description of the file contents.

(*) **Required when creating or modifying a document fields.**

Creation

When creating a new container or folder, enter the name and description. Remember to enter meaningful names as these will facilitate subsequent searches. You can optionally connect the container or folder with a client and / or project.

To add new files, click the tab *New files attachments* and specify the file by clicking the button *Select File* (The button text may vary depending on the browser or operating system). To add more files, click *Upload file* and repeat the above process.

Note that the number and size of files can be limited by the characteristics of the server on which SaltOS is staying. If you experience problems when uploading files, try uploading them one at a time and verify that the size of the same does not exceed the capabilities of the server.

Modification

Modifying a folder or file container, allows you to modify the same parameters as in the process of creation. Additionally you can add a comment.

To add more files, click *New files attachments*.

Consultation

Query mode allows you to query data from the folder as well as download attachments.

For direct access to detailed customer or related project, click the button next to the corresponding drop-down.

To individually download attachments, click the button *Download* listing, dentro tab *Attachments*. To download multiple files, mark the *checkbox* relevant and click *Download selected files*. Opens a compressed file format *ZIP* that contain the selected files.

To consult on file with the internal viewer SaltOS click *PDF Viewer*. Please note that the file format must be a document or image.
