# States

This application lets you keep track of all states that are used in different applications.

List of states

In the list of states you will find the most important pillars of registration:

- **Ref .:** Numeric code that identifies the state.
- **Name:** State name.
- **Application:** Application that is linked state.
- **Location:** Status position compared to other states linked with your application.
- **Description:** Description of the state in which cases are used, etc ...
- **Active:** If the state can be used in the linked application.

Listing Options

On each record. You can perform a series of actions that are represented by the following icons:

- **Q ✎ 🗑**: Check / Edit / Delete Record.
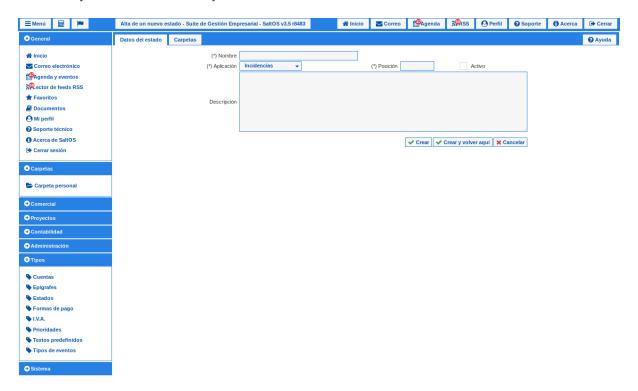

Filter Options
